

TURNPATH™

Hands-free steering for automatic, repeatable end-of-row turns.

Shown on the InCommand® Go 16

Automated

When approaching the end of the pass, the display automatically generates your guidance line for an accurate turn and approach to the next pass.

Simple and flexible setup

TurnPath takes you from your active pass to your target pass - no button presses required. You are able to adjust and fine-tune TurnPath while autosteer is engaged, so you can easily perfect the turn.

Comprehensive

Whether you want consistency in tillage from pass to pass, less overshooting when planting, or more uniform turns to reduce overlap or misses at application or harvest, TurnPath can benefit all operations on the farm.

TRY before
you BUY!

If you have an Ag Leader steering system, don't forget to utilize your free 24-hour TurnPath trial in the field!
